

Remediation Technologies

SUPPLEMENTAL CAPACITY PREPARING A MATERIALS MANAGEMENT PLAN AND SUPPORT ON GASWORKS REMEDIATION

- **CLIENT**

Regional Environmental Consultant

- **PROJECT DURATION & VALUE**

10 days | £2,000

- **KEY SERVICES**

Drafted a project materials management plan under DoWCoP
Adopted a GIS App
App was provided to consultants for real time reporting
COTC visits and monthly reporting to the EA

- **OUTCOME**

Additional gasworks structures were found during the remediation but were successfully removed and the project was completed on time and within budget.

A medium sized regional environmental consultancy was supporting a property company developing a former gasworks site.

RemTech provided some additional capacity during a busy period for the consultancy. Our depth of expertise in gasworks remediation supplemented the project team at little extra cost.

RemTech drafted the project Materials Management Plan under DoWCoP and advised on the identification and excavation of gasworks below ground structures as part of the discovery strategy. We visited site on several occasions to assist in the implementation of the MMP.
